

# Power point Example

**NEUROHEADWAY**

---

Neuroscience Into Education

## What is Intelligence ?

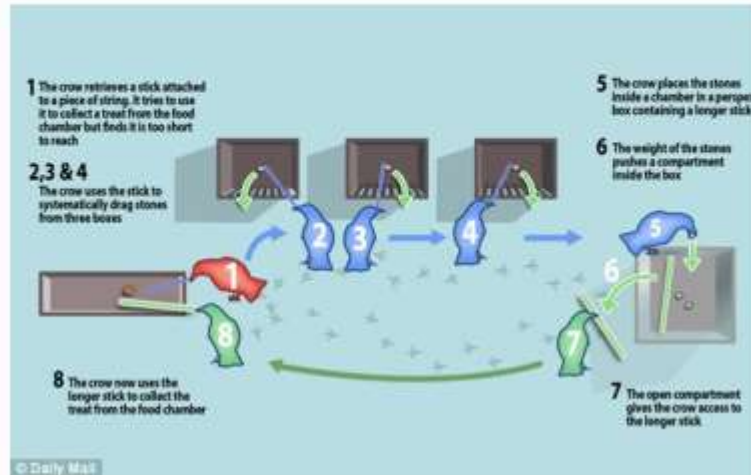

**Intelligence** is your capability to understand, learn, adapt, to solve problems, to be creative and to use all that knowledge to deal with situations yet to come.

## Example: A crow in a cage

## Further learning of a crow

Normally when we think of Natural Intelligence we think about how a brain functions, but there is more to NI than that. Through creative processes in our brains our behavior evolves with the rest of our bodies, and it responds to our changing environment.

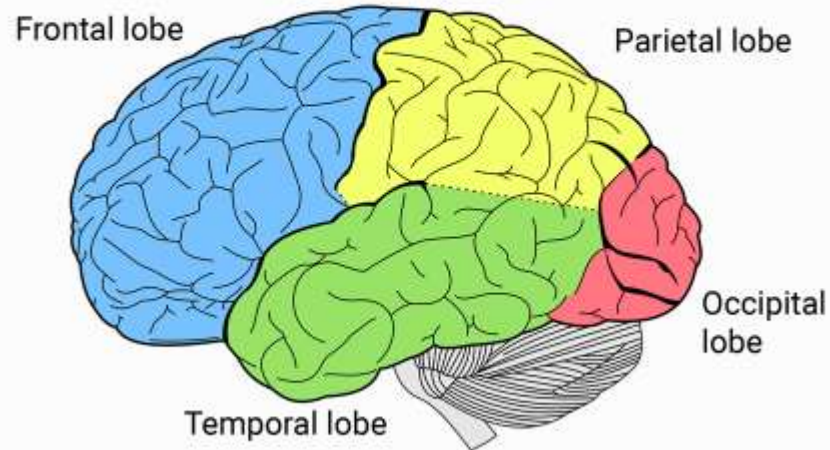

## Who has Intelligence?

## Most important features of the Natural Intelligence

## How is the brain organized ?

## What is the function of the left and the right hemisphere of the brain?
